

# WHERE FOOD COMES FROM

**Where Food Comes From** is a series for young children, introducing them to the growing and processing of different foods. The roles of farmers and others in the process are revealed and children are introduced to food groups. Young readers will learn how plants change over time and how to eat healthy.

- Supports C3 Framework for Social Studies: Exchange and Markets: D2.Eco.3.K-2. D2.Eco.4.K-2.
- Supports CCSS for Reading Informational Text – Grade Two: RI.2.1—RI.2.3 and Grade Three: RI.3.1—RI.3.3
- Text models sequential text structure as readers follow the process from resource to food product
- Each book concludes with an activity to support and extend learning
- Features include: Table of contents, labeled photos, captions, fact boxes, glossary, index, and an activity

### From Bee to Honey

*The bees collect more and more nectar until it is time to go back to the hive to unload.*

#### BEE FACT

A honeybee visits between 50 and 100 flowers on each trip.

#### BEE FACT

During the summer, honeybees feed on nectar and a little pollen. Inside the hive, the bees pass the nectar from one bee to the other and slowly turn it into honey.
